

ETHICAL STATEMENT

Manuscript Title: Record-Level Evaluation of a Morlet CNN–Conformer for Five-Class ECG Beat Classification

Authors: Alireza Abbaszadeh, Vahid Torkzadeh

Target Journal: *Revista Portuguesa de Cardiologia*

Ethics approval and informed consent:

Ethics committee approval and informed consent were not required because this retrospective computational study used only the publicly available, fully de-identified MIT–BIH Arrhythmia Database. No participants were prospectively recruited or contacted, and no new identifiable human data were collected. The study was conducted in compliance with relevant laws, regulatory frameworks, and institutional guidelines applicable to research using publicly available de-identified data.

Funding:

This research did not receive any specific grant from funding agencies in the public, commercial, or not-for-profit sectors.

Competing interests:

Declarations of interest: none.

Generative AI assistance:

During the preparation of this work, the authors used OpenAI ChatGPT (GPT-5.6 Sol) to improve the readability and language of the manuscript. After using this tool, the authors reviewed and edited the content as needed and take full responsibility for the content of the publication.
